

## Content Management System (CMS)

WebsiteBaker is a free PHP based content management system (CMS) that makes it fast and simple to edit web pages.

In order to work with the system it is necessary to log into Website Baker. The administration section, where you manage the site, can be found by adding /admin to the address of your website.

 i.e.: If your site address is [www.mysite.com](http://www.mysite.com) [www.mysite.com](http://www.mysite.com) then your Website Baker administration panel can be found at [www.mysite.com/admin/](http://www.mysite.com/admin/)

You will see a login screen with places to enter in your username and password.

 **Note:** You can use Website Baker with any web browser. For full functionality you need either Internet Explorer or a recent Mozilla based browser like Firefox.
